Creative Communities on a *Shared Island*

Local Authority Partnerships with Creative and Community Organisations

2026-2028

Culture & Creativity Teams in local authorities

- The Culture and Creativity Teams are the cornerstone of *Creative Communities* across all local authorities.
- These teams bring together a significant range of expertise and, in many cases, include professionals from architecture, archives, the arts, climate action, community, enterprise and environmental development, heritage, information and communication technologies, Irish language, libraries, spatial planning, tourism and more.
- This depth of technical expertise affords each local authority a level of insight, resources and delivery experience which few other public or private sector organisations can match

and you may be included as part of a collaboration

Criteria

Shortlisted applications will be reviewed by an assessment panel made of representatives of the Creative Ireland Programme and other Departments.

This is a competitive scheme, and we expect a large volume of high-quality applications.

Funding is not guaranteed even if shortlisted.

We aim to produce a balanced programme with representation from across the island.

We intend to support projects which are clearly driven by a creative and cultural approach with strong creative partners
